Model Providers and their model details:

Model Provider	Model	Release Date	Knowledge Cut-off Date	Cost of Tokens, Input / Output	Context Window	Type	When to use this model
OpenAI	GPT-6.1 Sol	29-Sep-26	30-Apr-26	$2 / $10	1.05M	Proprietary multimodal reasoning model	Use for complex coding, professional analysis, tool-calling agents and long-context workflows where strong quality is needed without the higher cost of GPT-6 Astra.
Anthropic	Claude Fable 5.1	1-Sep-26	Jun-26	$10 / $50	1M	Proprietary multimodal, long-horizon reasoning and agentic model	Use for difficult research, extended autonomous tasks, complex document reasoning and high-value workflows where accuracy is more important than token cost.
Google	Gemini 3.5 Flash	20-May-26	Jan-25	$1.50 / $9	1M	Proprietary multimodal reasoning model	Use for high-volume applications requiring text, image, audio or video understanding, particularly when Google ecosystem integration and

							fast responses are important.
xAI	Grok 4.7	21-Sep-26	May-26	$2 / $6 below 200K input; $4 / $12 at 200K or more	500K	Proprietary text-and-image reasoning model	Use for coding, knowledge work, agentic tool use and workflows that benefit from optional web and X search. Watch the price increase when prompts reach 200K tokens.
DeepSeek	DeepSeek V4 Flash 0731	31-Jul-26	May-25	Approximately $0.06 / $0.18, depending on host	1M	Open-weight, text-only sparse MoE reasoning model	Use for economical coding, reasoning, repository analysis, long-document processing and self-hosted agent workflows. Provider prices vary substantially, so pin the inference provider in production.
Alibaba	Qwen3.8 Flash	26-Aug-26	Not publicly disclosed	$0.15 / $0.47	1M, approximately 991K usable input	Proprietary hosted multimodal MoE model; related Flash-Next weights are available separately	Use for low-cost, high-throughput coding, document processing, vision tasks, reasoning and tool calling. It is a strong option when cost per request matters more than

							maximum flagship capability.
Moonshot AI	Kimi K3.1 Pro	23-Oct-26	Not publicly disclosed	$2 / $10	1.05M	Open-weight multimodal MoE reasoning model	Use for long-horizon coding agents, screenshots and documents, financial research, 3D creation, large-context analysis and workflows requiring self-hostable weights.
Meta	Muse Wonder	12-Oct-26	Not publicly disclosed	$4 / $20	1,048,576 tokens	Proprietary multimodal agentic reasoning model	Use for long-running coding, personal or professional agents and workflows that benefit from cross-session memory. It accepts text, images, video, audio and PDF inputs but produces text output.
Mistral AI	Mistral Large 4	6-Oct-26	Not publicly disclosed	$0.70 / $2.10; cached input $0.07	1M	Open-weight multimodal MoE reasoning model	Use for multilingual enterprise applications, EU-oriented deployments, image-and-text analysis, reasoning, coding and self-hosting. Its low cached-input price is useful for repeated large prompts.

Amazon	Nova 2 Lite	2-Dec-25	Oct-25	$0.30 / $2.50	1M	Proprietary multimodal reasoning model on Amazon Bedrock	Use for AWS-native customer-service assistants, document and video extraction, grounded answers, code generation and multi-step business automation.
